Hello. My name is Seiko. I'm a third-year student at a junior high school. I live with my mother, father, and my younger brother who is three years old. My father is working at a computer company. My mother does not have a job. She cooks, cleans, and takes care of my brother at home every day.

Last night, when we were having dinner, my mother said, "I want to go to college or university next year. I have always wanted to become a teacher." My father and I were very surprised to hear that. He didn't like her idea. He thinks if she goes there, she can't take care of my little brother. Money is also a problem. She will need a lot of money to study. My father and I understand her dream but we can't agree easily.

I think all of us have chances to study and should not give up even after we become fathers or mothers. I'm sure she can be a good teacher if she tries, but there are other things to think about.

繰り返します。
